Professional Summary

Results-driven Full-Stack Software Engineer with robust experience building scalable, production-ready web applications using React, Node.js, and modern JavaScript. Adept at designing clean, modular architecture, integrating third-party APIs (payment processors, AI tools), and developing real-time, low-latency systems. Passionate about delivering performant, user-centered applications that bridge seamless frontend experiences with highly scalable backend infrastructures.

Technical Skills

- Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion
- Backend: Node.js, Express.js, RESTful APIs, Supabase (PostgreSQL), MongoDB, Firebase
- State Management & Data Fetching: Zustand, Context API, React Query
- Integrations & APIs: Paystack, Amadeus API, WebRTC, WebSockets, OpenAI APIs (Whisper, Vision)
- Tools & Operations: Git, GitHub, Vite, Webpack, Postman, Render

Professional Experience & Projects

ZenCart – AI E-commerce Platform (Production)

Full-Stack Engineer | Live Demo: [ZenCart Demo](#)

- Engineered a production-ready e-commerce platform explicitly tailored for the local market, implementing comprehensive user workflows.
- Architected and integrated a robust backend for order tracking, messaging, and logging.
- Integrated Paystack for secure, instantaneous NGN payment processing and order fulfillment.
- Developed an automated WhatsApp-based ordering system to facilitate direct, real-time customer interaction.
- Pioneered AI-driven features including multilingual voice-to-text ordering using the Whisper API and a comprehensive fraud detection system utilizing the Vision API for image/video verification.

Food Dash – Food Delivery Platform

Full-Stack Engineer | Live Demo: [Food Dash Demo](#)

- Designed and built a comprehensive food delivery ecosystem utilizing React, Express.js, and Supabase.
- Configured a scalable backend architecture incorporating custom REST APIs for product modeling, real-time order processing, and historical data management.

- Spearheaded Paystack payment integration, streamlining the complex checkout and security verification flow.
- Enforced strict backend data validation and schema integrity utilizing Zod.

MyBox – Full-Stack Movie Application

Full-Stack Engineer | Live Demo: [MyBox Demo](#)

- Built a highly interactive movie discovery platform using modern React, Node.js, Express, and MongoDB.
- Developed a robust authentication system ensuring secure user session management via JWTs and persistent local storage with Zustand.
- Engineered 6+ core RESTful API endpoints catering to user authentication and CRUD operations for managing favorite movies dynamically in MongoDB.
- Integrated the OMDb API for real-time movie search, filtering, and recommendations.
- Successfully deployed the application backend on Render, configuring environment variables and ensuring seamless CORS handling.

Real-Time Chat Application (weCHAT App)

Full-Stack Engineer

- Built a high-performance messaging interface utilizing React and Supabase.
- Deployed WebRTC integration enabling resilient, low-latency communication across distributed clients.
- Managed secure authentication flows, complex session handling, and persistent data storage mechanisms.
- Engineered a fully responsive and accessible UI employing Material UI design standards.

50 Reusable UI Component Library

Full-Stack Engineer | Live Demo: [Reusable UI Demo](#)

- Developed a sleek, open-source library of 50 customizable Next.js and Tailwind CSS components.
- Leveraged Framer Motion to embed smooth micro-animations, greatly enhancing baseline user engagement.
- Maintained centralized UI patterns optimizing rendering cycles and developer adoption.

Education

B.Sc. Geography and Meteorology

Nnamdi Azikiwe University, Awka, Nigeria (2023)

Core Competencies

System Architecture • Agile Problem-Solving • Cross-Functional Collaboration • Performance Optimization • Adaptability
